Loss Survivor Resources FINAL_7.13.23.pdf

The FL LEADS project in partnership with the Statewide Office for Suicide Prevention, EscaRosa Suicide Prevention Coalition, and others, just recently put together a statewide *Suicide Loss Survivors Resource Guide*. It was a several month project that valued lived experience loss survivors as the core of its development; lots of outreach, collaboration and feedback from those who have lost. This document will live on the DCF Suicide Prevention webpage, as well as the FL LEADS project webpage,

FSPC wants to highlight this resource and encourage readers to share the link broadly as it could be of great help to recent and ongoing loss survivors.

Note: The Florida LEADS Project is a five-year, federally funded grant based on the [Zero Suicide Model](#) and acts as a multi-system approach, rooted in cultural competency and evidence-based research. The project aims to reduce health disparities and inequalities that affect the lives of adults, ages 25 years and older, at risk for suicide and/or experiencing behavioral health disorders, serious mental illnesses, and substance abuse addictions.

Resource Guide for Suicide Loss Survivors

Florida and National Resources

Suicide takes the lives of about 47,000 Americans each year. Every one of these deaths reverberates through families, workplaces, schools and universities, religious organizations, and other social networks. Those left behind after the suicide of a family member, friend, or colleague are referred to as "loss survivors." Navigating the loss of a loved one by suicide can be a struggle, but you are not alone in this. Other loss survivors share your experience and have contributed to creating resources to help you cope and move forward in your life.

Decreasing the Stigma Associated with Suicide:

Promote safe messaging: Please use safe messaging, replacing terms like “committed suicide” or “completed suicide” with “died by suicide”. This helps us think about suicide in the same way as any other health condition like dying from cancer or heart disease rather than a moral problem, choice, goal to achieve, or a crime. Using safe messaging promotes help seeking behavior and respect for the individuals who are currently battling suicidal ideation, have lost their lives to suicide, as well as their families and loved ones.

More information on safe messaging can be found here: [Suicide Prevention - Florida Department of Children and Families \(myflfamilies.com\)](#)

Sharing Available Resources and Upcoming Suicide Prevention Events:

Ensure that all of the great work done in our state is not siloed, yet we are funneling a comprehensive listing of suicide prevention trainings and events. The Statewide Office for Suicide Prevention is working to ensure that this information is regularly updated. Please see the instructions on the suicide prevention website at <https://www.myflfamilies.com/suicideprevention> if you have an upcoming suicide prevention event that you would like to share across the state.

FSPC WANTS YOU!

By Stephen Roggenbaum, Chair, FSPC

Link: <https://floridasuicideprevention.org>

The Florida Suicide Prevention Coalition (FSPC) is currently represented by numerous wonderful ambassadors. Officers and Regional Directors serve as a contact for various Florida regions providing information, responding to inquiries, networking with local contacts, & advocating for effective prevention initiatives.

You can join FSPC, run for office, or volunteer to serve as a Region Director. A person does not necessarily need to live in the Region he/she represents but is aware of the services and opportunities available while serving as a resource point person. An interested individual can also assist a current Region Director as he/she becomes more comfortable contributing and supporting suicide prevention through FSPC.

If interested or for more information, please contact Steve Roggenbaum (roggenba@usf.edu). See first page of newsletter (box at left) for Regions and associated counties.
